

# COVER FOR MINI GROW BED & CROP SUPPORT FRAME

This cover has been tailored to fit over the Garland Mini Grow Bed & Crop Support Frame. The contents of this product are as follows -

## **Qty Item Description**

1	Clear Cover
8	Metal Ground Stakes

## **USER INSTRUCTIONS**

Fitting is straightforward - simply slip the cover over the aluminium frame of the Mini Grow Bed & Crop Support Frame. The stitched green seams of the cover should follow the contours of the side arches of the frame. The cover will extend to the floor and will fit outside of the plastic grow bed base.

The cover is a close fit to guard against its displacement by strong winds. If you are using your Mini Grow Bed on soft ground, you can further secure the cover by identifying the eight anchoring loops at the base of the cover and using the supplied metal ground stakes to secure the unit to the ground.

The central zip door can be held 'open' by use of the two green ties at the top of the door section. Similarly, the two side vent windows can be secured 'open' by using the ties provided to secure the clear panels which otherwise cover the vent windows.
